Lab 8: More Classes

Instructions

After reading 'Chapter 8: Classes' in the "Learning TypeScript" book, start with the section titled 'Classes and Interfaces' and complete all coding for the first Student class with interface Learner, adding necessary code to prevent errors. Be sure your code compiles cleanly.

There is no Canvas submission for this project, you will submit your work to a GitHub repository as described below.

Submitting your work

Once your project is complete, commit your files (source code along with a screen snip of your compile output) to the provided classroom repository. Your instructor will clone and grade your repo after the due date for this assignment.

There is no Canvas submission for this project.
